

WEEK 5

FRIDAY FUN FACTS

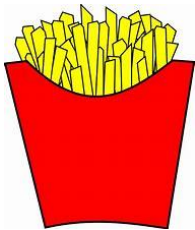

How do we hear? Sounds travel into our ears and hit the eardrum; the movements (called vibrations) are picked up by the cochlea and sent to the brain

The smallest shark in the world is the Dwarf shark and can be as small as a human hand

The surface temperature of a star can range from 3,000°C to over 50,000°C. The surface temperature of a star will determine its colour; the cooler stars are red in colour the hotter stars are blue

French fries did not originate from France

If you suffer from a fear of no phone signal, you have nomophobia.
